Manual Single-Channel Adjustable Color Pipette (Metal Tip)

NEW

Pipette for Electrophoresis Experiments: Available in metal tips with ranges of 0.1-2.5µL, 0.5-10µL, and 2-20µL. Compatible with 10µL extended tips, ensuring fast, accurate, and stable loading for electrophoresis.

Small Tips for Electrophoresis Sample Loading:

· Shake the sample and Marker before loading.
· When loading, press the tip against the short glass plate, slightly tilt the HiPette electrophoresis-specific pipette to contact the liquid surface, and then add the sample slowly and evenly into the well comb to reduce bubble formation.
· Use extended pipette tips and replace the tip for each well to avoid sample and Marker contamination.
· Ensure that the sample volume and loading volume are consistent.
· Avoid using the outermost wells to prevent bending of bands due to uneven electric fields. Fill the wells with loading buffer if needed.
· Ensure the pipette tip is securely attached. The HiPette electrophoresis-specific pipette has two settings: first, press to the first setting, then immerse the tip into the sample and release the plunger. For sample loading, press down slowly, then switch to the second setting to ensure the entire sample is dispensed.
· Add buffer first, then add the sample to avoid sample being pushed to the sides.

Constant temperature bath

NEW

Advantages

Efficient Heat Transfer Performance: Equipped with high-quality heating elements, temperature sensors, and intelligent PID temperature control technology, ensuring uniform and rapid heating.

1L silicone oil, set at 120°C, 500rpm, with a heating rate of 3.1°C/min, as shown in the temperature curve below.

Transparent Glass Bath: Good transparency for easy observation of the changes in the state of the reactants.

Precise Temperature Control: Optional magnetic stirrer for improved temperature uniformity within the bath, ensuring accurate temperature control.

Remote Operation: The operating unit (controller) is separated from the main unit, allowing safe operation up to a maximum distance of 1m (cable length). For example, the equipment can be used in narrow spaces (e.g., fume hoods or ventilation areas), while the controller remains unaffected by smoke and other contaminants.

Safety Guard Design: The bath comes with a protective guard mounted on a stand, preventing direct contact between the heating vessel and the instrument's heating tube, thus preventing potential hazards. It also helps to place beakers or other containers, making them less likely to tip over.

Safety Protection Functions:

1.Over-temperature Protection: If overheating occurs or the sensor malfunctions, the machine will display an error and stop heating.

2.Overcurrent Protection: In the case of a short circuit, the machine will automatically cut off the power supply to ensure operator safety.

3.Equipped with a safe grounding fault protection design.

Temperature Calibration Function: Features automatic temperature calibration and a factory reset function.

Ease of Operation: Simple design with an intuitive interface, making it easy for users to set and adjust the temperature.

Application

Pharmaceuticals, pesticides, fragrances, dyes, pigments, additives, fibers, petrochemicals, pharmacy, physics, chemistry, industrial chemistry, polymers, functional molecules, applied chemistry, and other fields.

- Every rotor can reach a maximum Speed of 15000rpm
- Rotors are seated on a tapered shaft,concentric and self-aligning, perfect to achieve running stability at high speeds
- D3024&D1524&D1524R with three-layer sealed rotors/ anti- sample overflow prevents accidental leakage
- D3024&D1524&D1524Rrotors have passed MCA test according to IEC/EN61010-2-20, including mechanical safety and bio-safety tests
- Powerful cooling system minimizes rotor heating. D3024&D1524 rotors maintain at 10°C and D1524R rotors less than 8°C after running an hour

Seals within the aluminum alloy rotor

Three rubber seals fitted to achieve bio-safe condition

Rotor Features

Fully autoclavable

High strength aluminum alloy rotors are fully autoclavable, withstanding steam sterilizing at 121°C for 20 minutes

Three-layer seal

D3024&D1524&D1524Rrotors are designed to prevent sample leakage. Each and every rotor is hermetically sealed by three rubber seals.

Mechanical safety

DLAB centrifuges confirm to MCA standard IEC/EN61010-2-20, causing disruption by partially cutting and overloading rotor assembly, and guarantees that no part shall be detached to cause danger to person or the environment.
